SURFACE PREPARTION:

NEW SURFACES:

Surfaces must be clean, dry and free from all loose or powdery materials, grease, wax or other foreign matter. All staining and filling must be done using non bleeding type stains prior to the application of No. 66 Sealer.

PREVIOUSLY COATED SURFACES:

Previously varnished surfaces must be sanded to remove all gloss, loose or poorly bonded varnish. Test patch a small area to determine the compatibility of No. 66 Sealer with existing coating, to insure that no lifting or wrinkling occurs. If lifting or wrinkling develops, it is necessary to completely remove the old finish before proceeding.
