

60-60A Case History

Product: Flame Control 60-60A spray applied over closed cell, 2lb insulation to provide a 15-minute Thermal barrier.

The Job: A vacant commercial property being completely retrofitted into low cost housing

Application Details: Phase 1 featured airless sprayer application of 60-60A to over 9,500 square foot of spray polyurethane foam insulation. The insulation was installed in the cavities between large support beams that comprise the ceiling support structures within the facility. 60-60A was spray applied in a single coat to achieve the 15-minute thermal barrier rating.
